# User Interface Mocks

1) This is my main page. I will want a design for the buttons, but blank so that I can have different translations.

2) I will also want a design for the sword/logo picture. Something similar to above for the main page. Plus, a smaller version of the swords only with the text saying "SoA" instead for the icon.
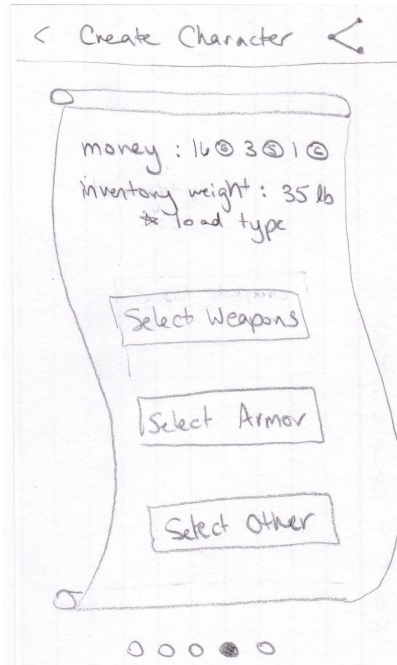

3) Most of my screens have scrolls like above as the background. I would like to have a few versions of a scroll for a few varying lengths. I'm thinking 3-4 slightly different versions for the full page scroll, and 2-3 for the smaller ones. This is just to make it not look copy-and-paste, so they aren't too different between them.

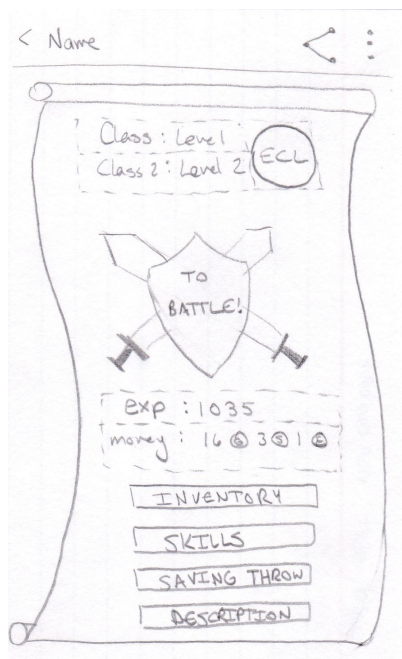

4) This may be for a later date since it's more elaborate, but I'm eventually wanting drawings for the animals. I would like them to be in this sort of style:
https://www.pinterest.com/pin/260997740878911746/ or
http://howtotrainyourdragon.wikia.com/wiki/File:Timberjack.png

5) I would like three little coins, one gold, one silver, and one copper.

6) I would like there to be different stamps from numbers 1 to 20. The stamps should look like a wax stamp, sort of like this:
http://2.bp.blogspot.com/-E0Magwhq1c0/UXdCgbibcSI/AAAAAAAABOs/O5qUNnTbMY8/s1600/IMG_8452.jpg

7) I would like an image like the shield and sword picture I have above. The words should not be there so that I can make it translatable.

8) I would like a little icon for the shield. There should be no numbers or letters on it so that I can change it dynamically.
